Welcome

**Creative Group Head | Visual Storyteller |
Typography Lover | Design-Obsessed Since Forever**

I'm a 39-year-old Creative Group Head based in Mumbai, fueled by a lifelong love for design in all its forms—graphic, web, packaging, branding, and especially the subtle art of typography. For the past 14+ years, I've been turning ideas into visuals that not only look good but feel right.

I believe great design isn't just seen—it's experienced. That's why I'm always chasing bold concepts, clever layouts, and fresh collaborations. I work best with passionate minds who live and breathe creativity like I do.

Let's create something unforgettable. Scroll down and see why I might just be the creative force your team needs.

Resume

Educations

From September 2008 to September 2011.
Commercial Fine Arts.
Abhinav College of Fine Arts. Pune, Maharashtra.

From April 2004 to July 2007
Bachelor of Commerce.
Shivaji Mahavidalaya, Udgir, Maharashtra.

**INNOVATION
ALWAYS INSPIRES
US TO EXPERIMENT.**

The crow came up with the bright idea of dropping pebbles in that the water level rose in the pitcher and quenched its thirst. That's the power of innovation. It enables us to conduct experiments and deliver solutions that extend and improve patients' lives. Innovation, for us, is at its greatest when we develop new and innovative ways to reach out to patients.

The crow is perched on the rim of a large, brown, earthenware pitcher. It is in the process of dropping a small, dark pebble into the pitcher. The pitcher is filled with water, and the water level is visible. The background is a desert landscape with rolling hills and a warm, orange-hued sky, suggesting a sunset or sunrise. The ground is sandy and covered with many small, dark pebbles, some of which are scattered around the base of the pitcher.

 **NOVARTIS**
PHARMACEUTICALS

[illegible]

PERFORMANCE ALWAYS GIVES US THE EDGE.

While the grasshopper lazed around aimlessly during the sunny days, the ants were busy collecting and stacking up provisions for the winter. That's the power of team performance. Performance is in our DNA at Novartis. Our long track record bears testimony to our belief in both self and team performance with the purpose of serving patients and customers.

QUALITY ALWAYS PUSHES US TO GO THE DISTANCE.

The tale of 'The Sculptor' who would not compromise on the quality of his creation and continued his pursuit of perfection teaches us the power of quality. Quality, at all times, is the cornerstone of our processes at Novartis, because our patients' and customers' expectations are ever-increasing and ever-evolving. This is what helps us deliver the right drug to the right patients at the right time, with the highest quality.

COURAGE ALWAYS EMPOWERS US TO CHALLENGE THE NORM.

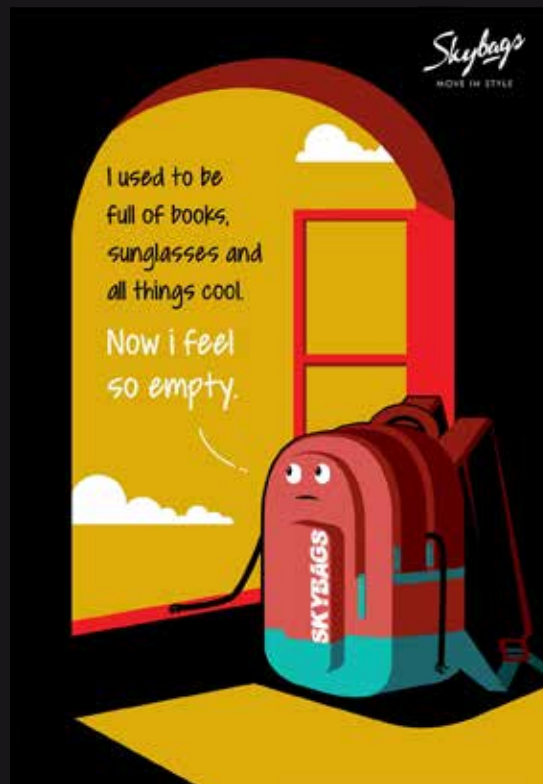

David, a simple messenger, challenged and shaped the dreadful giant, Goliath. David's story of courage is inspiring and an inspiration for all. Courage gives us the power to overcome at the right time even if it is at the risk of failing. It would be the perfect catalyst that propels us to try something new every time in order to deliver remarkable results.

THE PLACE.**

HAIR TRANSPLANT
THE 315P 360/1100

Remove your hair with a Hair Transplant by Richfeel, the pain-free all-in-one solution to hair loss. Surgical hair restoration involves extracting hair from a hair loss area and planting them on the permanent balding area. Even though it is a highly precision in its permanent results, these methods are invasive, and there are different techniques for a hair transplant. Richfeel's Hair Transplant is a non-surgical hair transplant, where results can be seen in 8-10 months, with precision to the scalp.

Our newest marketing
 ★★ *genius* ★★
 is not from marketing.

An IT associate coming up with a marketing idea? Why not!! Because we believe that ideas can come from anywhere. Even if their person has nothing to do with that division or function. And every good idea will be given its due credit and recognized for what it is. It is this belief in the power of harnessing diverse talents and cross-functional teams that will enable us to keep "Winning for Patients".

★
 DIFFERENCES MAKE US DIFFERENT.

A trainee associate's
idea just went
 ❖❖ *global.* ❖❖

Only seniors can have a good idea. That's a myth; one we don't believe in. What we do believe – and what makes the difference – is that everyone, be it a trainee or a junior associate has a right to an opinion. And when coupled with our senior associates' ability to recognise the brilliance in the opinion, it translates into a great idea that makes "Winning for Patients" possible.

❖
 DIFFERENCES MAKE US DIFFERENT.

Men are from earth.
 So are
 ❖❖ *women.* ❖❖

Men are not from Mars and neither are women from Venus. Yes, they do differ in the ways in which they think and act. But in this difference lies our greatest strength. By harnessing the power of these distinct perspectives, we can not only usher in gender equality, but also bring the best of both worlds together to continue "Winning for Patients".

❖
 DIFFERENCES MAKE US DIFFERENT.

Differences make us Different.

When different musical notes are combined in a way that the power of every single note is harmonised effectively, a brilliant harmony is born. It's the same when diverse talents, experiences, backgrounds and offerings are effectively combined to achieve a common objective. At Novartis, we simply call it 'Diversity & Inclusion'. Because to win for patients, we've got to be different.

Differences make us Different.

When different ingredients are combined in a way that the power of every single ingredient is harmonised effectively, an exotic and exclusive cuisine is born. It's the same when diverse talents, experiences, backgrounds and offerings are effectively combined to achieve a common objective. At Novartis, we simply call it 'Diversity & Inclusion'. Because to win for patients, we've got to be different.

Differences make us Different.

When varied colours are combined in a way that the power of every single colour is harmonised effectively, a brilliant piece of art is born. It's the same when diverse talents, experiences, backgrounds and offerings are effectively combined to achieve a common objective. At Novartis, we simply call it 'Diversity & Inclusion'. Because to win for patients, we've got to be different.

THANKS, FOR MAKING OPTIMUM USE OF THE WATER IN THIS GLASS

Now, let's pledge to do the same with every natural resource. This World Environment Day, let's come together to sensitize ourselves and the world on the need to live sustainably by doing more and better with less.

World Environment Day (WED), celebrated every year on **05 June**, is United Nations' principal vehicle for encouraging worldwide awareness and action for the environment. It also serves as **'people's day'** for contributing positively towards the environment.

As the first step towards conserving and protecting the environment, find something very useful on your desk, tomorrow.

An initiative by Sandoz House Safety Committee.

HOW MANY THINGS CAN YOU DO WITH JUST ONE GLASS OF WATER?

Assume you've got a glass of water, approximately 250 ml. List down the number of things you can do with this. The more the number, the better your score.

Send in your list to suresh.akeela@novartis.com, before **3 pm on 04 June, 2015**. The highest scorer will be awarded.

An initiative by Sandoz House Safety Committee.

ONE DAY IS NOT ENOUGH TO SAVE THE ENVIRONMENT

However, one day is enough to take the first step towards preserving the environment. One day is enough to sensitize ourselves on the need to live sustainably. One day is enough to learn the art of doing more and better with less. One day is enough.

And that one day is **05 June 2015**. So, block your date.

Sapling Plantation

To celebrate this occasion, a sapling plantation drive will be held on **05 June, 12 noon to 1 pm**, at the **Nature Planetarium Garden (Opposite Sandoz House)**. Participants must assemble in the first floor cafeteria by 11.45 am. Saplings will be distributed to the first 25 registrations.

Register now by sending your name to suresh.akeela@novartis.com

An initiative by Sandoz House Safety Committee.

What is Face 2011?

Face 2011 is an iconic exhibition. A life-changing destination. A never-before opportunity.

There are many ways to describe one of the most fascinating events of the year - Face 2011. But to grasp the essence and impact, you need to experience it to the fullest. Get a taste of all the thrill, buzz and joy that it brings.

We believe that a face speaks volumes. It forms the identity of the person and also is the instrument to make a lasting impression. Face 2011 is in effect a tribute to the human face and is designed to uncover its true beauty and potential.

Packed with the best beauty brands, latest face treatments, in-depth workshops, the finest professionals in the beauty industry, top-notch entertainment and exciting cuisine, Face 2011 not only helps to enhance the beauty of the face but also promises to be a thoroughly unforgettable experience.

Face 2011 isn't just an exhibition, it is a powerful platform to reach out to the target masses. Thus, there are more reasons than one to be a part of Face 2011.

Face to face interaction with the target audience
Instead of communicating with the target markets only through various media, Face 2011 is a way of establishing direct contact which can instantly transform your sales. (Also the exhibitor gets to learn the customer's psyche and needs, right from the source itself!)

Increased lead generation and sales
With the number of offerings that Face 2011 has lined up for the masses, there would be a great amount of target traffic here. This would ultimately result in a sufficient increase in lead generation and sales. Face 2011 will also be a strong networking opportunity, as one can get to meet all the leading entities in the beauty industry.

Strengthening brand profile and image
At Face 2011, every exhibitor can be seen and heard by thousands. As various media such as print, radio, etc., are put to use, it is easier to make an impact on the masses and leave a lasting impression. Exhibiting variety of products/services offered can instantly attract scores. Also this is a great opportunity to launch new brands/products as one can determine the nature of response, almost immediately. This greatly helps in strengthening the overall brand image.

Relationship building
Face 2011 is a great way to build a strong relationship with the customer. Not only can the target demands be known, but also a great insight on their mindset and preferences can be discovered. Directly educating the target masses on products and services is possible, thereby helping in strengthening relations with the end user/customer.

Favourable conditions
The entire exhibition is strategically planned and well organized so as to create an excitement charged and fun filled space. Such an audience would put the target masses in the best of their moods and would be conducive to increased sales.

Why be a part of Face 2011?

Who would attend Face 2011?

Although the fact that Face 2011 would create would reach out to thousands, including both men and women, our primary target audience are women. These we estimate would belong to the following target groups:

Net A+ (Social economic group)
This class of people is extremely beauty conscious and enjoy a higher financial status. Therefore the capacity to spend is more. Face 2011 with its attractive offerings would be seen as a style symbol that's too good to miss by this class.

Net A (Social economic group)
This class has a good amount of disposable income. They are also beauty conscious and with proper education & marketing can become loyal consumers. Face 2011 would attract a large chunk of this class, partly because of the rich variety of products and services along with the ambience it offers.

Face 2011 offers an experience of a life-time and endeavours to give life a face-lift. Every offering at Face 2011 is created to greatly enhance the beauty of the face.

Best Beauty Brands
All the finest beauty brands can be found under one roof here. Cosmetic products helping in accentuating the beauty of every aspect of the face, be it the eyes, nose, lips or skin, as well as hair-care products and accessories can be found.

Leading professionals from the beauty industry
Right from top-notch dermatologists, cosmetologists, dentists to beauticians, the world of beauty can be found at Face 2011.

Informative seminars
Seminars by the finest in the industry are arranged to educate the target masses. Here useful advice and tips on enhancing the beauty of the face are given by the best of the best.

Engaging workshops
Various beauty workshops are conducted by industry professionals thereby helping in achieving a greater level of interaction with the target masses.

Exciting contests
There would also be a hunt for the face of Face 2011, from amongst the target audience. This would generate further buzz around the exhibition when the contest winner would be announced.

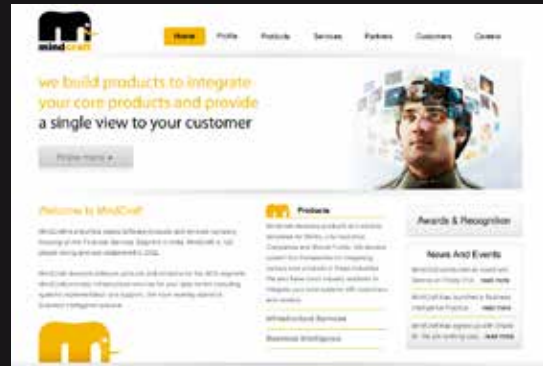

Top-notch entertainment
A spacious mélange of music and dance will keep the atmosphere thrill-charged throughout the duration of the exhibition.

What does Face 2011 Offer?

PREGNANCY PLANNER
An interactive journey of 9 months

Johnson's Pregnancy Planner is a free online tool that helps you track your pregnancy progress and provides personalized advice and support.

Average normal pregnancy lasts for
283 days, or 40 weeks

Conventionally, it has been divided into **3 trimesters**:

1st trimester
2nd trimester
3rd trimester

FIRST TRIMESTER
(WEEK 0-13)

SECOND TRIMESTER
(WEEK 14-26)

THIRD TRIMESTER
(WEEK 27-40)

3rd TRIMESTER CHECK LIST

- ✓ 1. Ultrasound scan
- ✓ 2. The water breaking
- ✓ 3. Cervical dilation
- ✓ 4. The progress of the baby
- ✓ 5. The position of the baby
- ✓ 6. The health of the mother
- ✓ 7. The health of the baby

THINGS TO EXPECT AND TIPS TO HANDLE THEM

**IT'S
IMPORTANT
TO STRIKE
WHILE
THE IRON
IS HOT!**

Important Notice: Iron is a mineral that is essential for health. The body cannot produce iron, so it must be obtained from food or supplements. Iron deficiency is a common condition that can lead to anemia, which can cause fatigue, weakness, and other health problems. Iron deficiency is most common in young children, pregnant women, and people with certain medical conditions. Iron deficiency can also be caused by poor diet, blood loss, or certain medications. Iron deficiency can be diagnosed by a blood test. If you suspect your child or yourself may have iron deficiency, talk to your doctor. Iron supplements can help, but they should be taken as directed. Iron deficiency is a serious condition that can lead to long-term health problems if not treated. Make your baby an

**WHY
IRON IS
ESSENTIAL
FOR
BABIES AND
CHILDREN?**

Iron is a mineral that is essential for good health and development of babies and children. Our bodies need iron to make hemoglobin, a protein that carries oxygen to all cells in the body. Iron gives red blood cells their color. When you don't have enough iron, red blood cells become small and pale. They can't carry enough oxygen to your body's organs and muscles. This is called anemia.

**WHAT
ARE THE
SYMPTOMS
OF IRON
DEFICIENCY?**

Iron plays a vital role in brain development for babies and children. Babies who don't get enough iron ("iron deficiency") may be less physically active and develop more slowly. They may also show the following symptoms:

Pale skin

No appetite

Infatigability (tiredness, fatigue)

Slow weight gain

Iron deficiency can affect child's performance in school. Low levels of iron can affect your child's concentration levels and make them feel tired and weak.

**HOW MUCH
IRON DO
BABIES AND
CHILDREN
NEED?**

Full-term babies are born with a reserve of iron, which comes from their mother's blood while they are in the womb. For the first 6 months of life, breastfed babies will get what they need from their mother's milk. However, waiting too long after 6 months to introduce other foods increases your baby's risk of iron deficiency. If breastfeeding to eat as often, use a store-bought iron-fortified infant formula for the first 12 months. The formula should be used with breast milk.

Once babies start eating solid foods, the amount of iron they need depends on their age. The Recommended Dietary Allowance (RDA) is the amount a person needs every day to stay healthy.

Amount of iron per day (recommended daily allowance)

5 mg

9 mg

01:03

NO, COW'S MILK IS NOT A GOOD SOURCE OF IRON?

No, cow's milk is not a good source of iron. Even though cow's milk has about as much iron as human milk, the body doesn't absorb it well.

- Do not give your baby a bottle of cow's milk until you start to offer solid foods. Wait until your baby is 9-12 months old before introducing whole cow's milk.
- Drinking too much cow's milk can lead to iron deficiency.

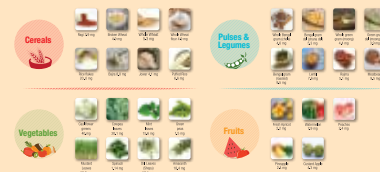

WHAT FOODS ARE BEST SOURCES OF IRON?

There are two different types of iron:

01 Heme iron is more easily absorbed by the body. It is found in meats.

02 Non-heme iron comes from plant sources like legumes, vegetables and cereals.

Foods that are rich in iron include:

5 PRACTICAL WAYS TO INCREASE IRON IN YOUR BABY'S DIET

Around 6 months of age, the iron stores are depleted, and your 6- to 12-month-old baby needs to be consuming about 5 mg of iron per day. A formula-fed baby will continue to get lots of iron from formula, in addition to complementary foods. However, if your baby is 6 months or older, mainly breastfed, and doesn't eat at least two servings of fortified baby cereal or meat per day, he could be at risk for iron deficiency. Toddlers (1-3 years) need 9 mg of iron per day.

5 ways to increase iron in your baby's diet:

01

Introduce a variety of iron-rich foods, including grains, meats, beans, and veggies. Feed your baby with iron-rich foods such as cereals, vegetables, guinea legumes and fruits to meet your baby's iron requirements.

02
Iron fortified baby food!
Iron fortified infant cereal is an important source of iron for babies. Introduce locally available baby foods at 6 completed months while continuing breastfeeding along with it. This should be the standard and universal practice. During this period breastfeeding should be actively supported.

03 Cook with fortified cereals.

Look for recipes that include iron-fortified baby cereals to cook food for your baby. The water in the recipe instead of milk to avoid the inhibiting effect of dairy on iron absorption. Foods can be enriched by making a fermented porridge, one of fermented or sprouted, and toasting of grains before grinding. 3-4 times intake of these fortified foods are sufficient to meet your baby's iron requirement.

04 Include a source of Vitamin C. Several studies have shown that including vitamin C in a baby's meal can at least double the absorption of iron from cereals and legumes. Apart from iron-fortified baby food, other baby-friendly sources of vitamin C include citrus, strawberries, cantaloupe, kiwifruit, raspberries, broccoli, bell peppers, oranges, pears and apples.

05

Limit dairy with meals. The calcium in cow's milk inhibits iron absorption, so avoid feeding dairy with high-iron meals. Instead feed cheese and curd as between-meal snacks. As above all, don't give your baby cow's milk before age 1 — stick with either breast milk or an iron-fortified formula.

YES

Before choosing any anti-VEGF
do you ask yourself the following?

1. Is it supported by 30 clinical trials with more than 12,000 patients?
2. Has it performed consistently across 17,00,000+ patient-treatment years of exposure across all indications?^{2,3}
3. Does it have a 7 years of data and 2800000 patient years supporting the safety of the drug?
4. Has it undergone multi-dose intravitreal toxicology tests for a duration of 26 weeks?
5. Is it manufactured with the E.Coli cell line, specially optimized by the Metcalfe process?
6. Does it undergo 250 stringent in-process tests to ensure batch to batch consistency?
7. Is it the one of 3 USFDA approved Fab fragment monoclonal antibodies used in Medicine?
8. Is it the licensed approved therapy for all 5 indications (wAMD/ DME/ RVO/ CRVO/ mCNV)?
9. Does it provide unsurpassed vision gain over a sustained period of 2 yrs?
10. Does it provide rapid reduction in retinal thickness maintained over period of 2 years?
11. Does it provide unique flexible dosing regimen with proven PRN and Treat & extend efficacy?
12. Does it have the least half life in systemic circulation?

Only **Accentrix** can affirm a 'yes' to all the above.

**Before choosing
any anti-VEGF
wouldn't you consider
the following?**

1. Is it supported by 30 clinical trials with more than 12,000 patients?²
2. Has it performed consistently across 17,00,000+ patient-treatment years of exposure across all indications?^{2,3}
3. Does it have a 7 years of data and 2800000 patient years supporting the safety of the drug?
4. Has it undergone multi-dose intravitreal toxicology tests for a duration of 26 weeks?
5. Is it manufactured with the E.Coli cell line, specially optimized by the Metcalfe process?

Only **Accentrix** says 'yes' to all the above.

I sincerely appreciate you taking the time to review my design portfolio and your patience in going through all the slides. It was a privilege to share my work with you, and I look forward to the opportunity of walking you through the details in our next discussion.

I am eager about the prospect of collaborating and contributing meaningfully to your team's vision.

Thank you once again for your time and consideration.
